

*noMAX sentry is a cost effective High Availability solution that facilitates the replication of data in your IBM i environment. With its powerful tools and superior technology, it is a best-of-breed solution that enables Disaster Recovery for your critical data.

BENEFITS

***noMAX sentry is a scalable High Availability solution that ensures you have the ability to keep your data secure – any time, all the time.**

- + Quick, easy and cost-effective to implement for businesses of all sizes
- + Easily navigable with concise, user-friendly menus
- + Like all *noMAX products, IBM Server Proven and designed for IBM i (i5/OS, OS/400) environments
- + Utilizes the capabilities of Remote Journaling enabling you to realize savings in resource, time and cost
- + Required only on your backup system and not required for your primary environment(s)
- + Quick, easy and cost-effective migration to *noMAX defender or *noMAX garrison is available if your replication needs grow

www.maximumavailability.com

THE *noMAX SUITE OF PRODUCTS

***noMAX can provide Data, Object, Spool File, IFS and MQSeries replication, depending on the requirements of your business.**

Data

Offers an easy to install, cost-effective stand alone replication solution

Object

Replication of Data Queues, User Profiles, Spool Files and enables 'on the fly' Dynamic Database changes and Role Swaps

IFS & MQSeries

Incorporates all the features of *noMAX sentry and *noMAX defender as well as replicating IFS & MQSeries

noMAX defender

*noMAX defender delivers secure, accurate and reliable replication of data, objects and spool files for your IBM i environment. It incorporates advanced features that include autonomies, enhanced auditing and user administration tools to meet the needs of organizations large and small.

BENEFITS

***noMAX defender facilitates the replication of data, objects and spool files between ASP's and LPAR's in either single or multiple IBM i environments as required.**

- + Like all *noMAX products, *noMAX defender can be quickly deployed and requires the minimum of resource to manage on an ongoing basis
- + Data Areas, Data Queues, User Profiles and Dynamic Database Changes can be replicated quickly and effectively with no disruption to your ongoing operation
- + A wide range of functionality is available to enhance the end-user's control and management over their IBM i (i5/OS, OS/400) environment. These features include; patrolMAX - a powerful system monitoring feature, autonomies, enhanced auditing, spool file replication, extensive configuration and management tools and both green screen and graphical user interfaces
- + A cost effective migration from *noMAX defender to *noMAX garrison is extremely straight forward if required by changes to your High Availability and Disaster Recovery needs

 noMAX

The ultimate High Availability solution for IBM i.
*noMAX garrison delivers the features and performance demanded by the very largest enterprise environments without compromising the dependability and flexibility for which all *noMAX products are renowned.

BENEFITS

***noMAX garrison is the ultimate in High Availability solutions, incorporating all of the features of *noMAX sentry and *noMAX defender as well as enabling the replication of IFS and MQSeries.**

- + Installation and implementation of *noMAX garrison is both quick and easy. Day-to-day management of the software requires minimal time and resource
- + *noMAX garrison offers secure, reliable data, object, spool file, IFS and MQSeries replication
- + Flexibility is the key. *noMAX garrison is fully spec'd with an extensive range of functionality that includes autonomies, enhanced auditing, spool file replication, extensive configuration and management tools – yet still runs extremely quickly and efficiently
- + You can migrate to *noMAX garrison easily and cost-effectively from both *noMAX sentry and *noMAX defender

Smart software for smart people

In the current global environment, no business can afford to lose its core information yet many are still under-resourced when it comes to their Disaster Recovery solution.

The *noMAX Suite of Products offers secure, reliable and cost-effective protection for critical information in your IBM i environments.

How secure is your information?
How important is your data to you?
How much downtime can your business afford?

ABOUT MAXIMUM AVAILABILITY

Maximum Availability, a world leader in high performance, cost-effective HA/DR software replication solutions, created the premium *noMAX Suite of Products to fully utilize the rapidly expanding realm of IBM i Remote Journaling.

*noMAX solutions have been successfully installed in a wide range of organizations, across many industry types and in over 40 countries around the world. *noMAX has proven itself to be fast, reliable, easy to use and simple to install.

Maximum Availability is an IBM Development Partner and *noMAX has been Certified as IBM Server Proven.

KEY FEATURES

All of the products in the *noMAX Suite integrate seamlessly and quickly with your existing technology.

*noMAX Product Features	SENTRY	DEFENDER	GARRISON
DATA REPLICATION	*	*	*
OBJECT REPLICATION		*	*
DTAARA / DTAQ	*	*	*
USER PROFILE REPLICATION		*	*
SPOOL FILE REPLICATION		*	*
DYNAMIC DATABASE MANAGEMENT		*	*
IFS REPLICATION			*
MQSERIES REPLICATION			*
CONCURRENT APPLY PROCESSES	UNLIMITED	UNLIMITED	UNLIMITED
SELECT / OMIT		*	*
LIBRARY REDIRECTION	*	*	*
ROLE SWAP / FAIL OVER		*	*
GRAPHICAL COMMAND CENTRE	*	*	*
GUI JOURNAL MANAGEMENT	*	*	*
RIGHT CLICK RESYNCH ON GUI		*	*
GREEN SCREEN MENU	*	*	*
AUTONOMICS FUNCTION		*	*
PATROLMAX MONITORING		*	*
PROPERTY FILE		*	*
AUDITING TOOLS		*	*
ASP & IASP SUPPORT	*	*	*
STANDARD TOOL SET	*	*	*
ADVANCED TOOL SET		*	*

*noMAX SERVICES

*noMAX is implemented by certified technicians and has many successful installations around the world. Services can be delivered remotely or with on-site support as required.

Find out for yourself how *noMAX works in your IBM i environment:

- + Arrange for a personal product demonstration
- + Run a free, no-obligation software evaluation
- + Start enjoying the benefits of *noMAX now
