

VAULT400 Earns Its Keep at Corrpro!

Below is a summary of an unsolicited e-mail from Mike Lemon at Corrpro, praising VAULT400 services.

I am continually amazed at the ways in which Vault/400 earns its keep!

I performed a restore this afternoon that took a small fraction of the time that it would have taken me to locate the tape, load it, execute the command, and re-archive the tape.

In addition, the backup solution provided by Vault/400 is much faster and more robust and dependable than our old method. No more media errors, write protects, jammed up job queues, or shuffling tapes to our offsite storage.

The bottom line: Less downtime. Less effort. More peace of mind.

Thanks for everything,

-Mike

About Corrpro

Corrpro, headquartered in Medina, Ohio, with offices worldwide, is a leading provider of corrosion control engineering services, systems and equipment to the infrastructure, environmental and energy markets around the world. Corrpro is the leading provider of cathodic protection systems and engineering services, as well as a leading supplier of corrosion protection services relating to coatings, pipeline integrity and reinforced concrete structures.
